☐ the language of publication of the international application (under Rule 48.3(b)).
☐ the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
☐ filed together with the international application in computer readable form.
☐ furnished subsequently to this Authority in written form.
☐ furnished subsequently to this Authority in computer readable form.
☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

1. The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been examined in respect of:

☐ the entire international application,

☒ claims Nos. 1-14

because:

☐ the said international application, or the said claims Nos. relate to the following subject matter which does not require an international preliminary examination (specify):

☐ the description, claims or drawings (*indicate particular elements below*) or said claims Nos. are so unclear that no meaningful opinion could be formed (*specify*):

☐ the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinion could be formed.

☒ no international search report has been established for the said claims Nos. 1-14

2. A meaningful international preliminary examination cannot be carried out due to the failure of the nucleotide and/or amino acid sequence listing to comply with the standard provided for in Annex C of the Administrative Instructions:

☐ the written form has not been furnished or does not comply with the Standard.

☐ the computer readable form has not been furnished or does not comply with the Standard.

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/DK 02/00784

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

The international search has been made on the basis of the originally filed claims, using the description and drawings to interpret them (Article 15(3) PCT).

Since the characterizing feature of claim 1 was not included in the originally filed claims but just mentioned in the description, this feature has not been searched. Therefore, no meaningful opinion can be given with respect to inventive step of claims 1-14 (Rule 66.1(e) PCT)

Re Item VII

Certain defects in the international application

In the description, particularly page 3, lines 26-33 and the drawings, figures 2-4 it is not unambiguously clear disclosed how the piston cylinder unit functions.

Moreover, it is not clear how by fitting the end plate (figure 2) a functional piston cylinder unit is created, since it unclear which part of the piston sealingly contacts the cylinder and where the hydraulic connections are foreseen.

Therefore, neither Article 19(2) nor Article 6 PCT is fulfilled.

Re Item VIII

Certain observations on the international application

It is not unambiguously clear if the expression reading "In front of this insert" on originally filed page 3, line 20 means "upstream" or downstream" this annular insert.
